

Maxime Charron and Corentin Lemaître Auger

Technical requirement- Duo Trapeze (standard number)

*** The length, height, music and style of the number can be adapted to the customer's request, please contact us for any requests or questions. ***

Each rigging point must support 750 kg / 1654lbs

The artists will provide (unless otherwise specified):

- The trapeze
- The music (CD, Mp3 or USB)
- Makeup
- Costumes

The customer must provide:

- A minimum height of 7.65 meters / 25' 5''
- A double attachment point with a working load of 750kg / 1354 lbs or more per point.
- An acrobatic crash mat (the size requirement is specified in the layout).
- An experienced acrobatic rigger for the installation and the verification of the rigging equipment.
- A ground perimeter that extends to at least a meter around each side of the mat, or an approximately 4x5 meter floor area.
- A sound system.
- A dressing room with mirrors and a warmup area.
- A rehearsal period with lighting.

Duration of the number:

The duration of the number is 6 minutes and 15 seconds.

Notes :

All of our safety and dimensional demands (heights and sizes) are expressing the minimal necessary requirements.

These are the requirements for a standard fixed duo trapeze number, you can find the technical requirements of the full number down below.

If the customer is in situation where he cannot provide one or multiple of the requirements listed above, he must notify the artists in advance, in order for them to adapt the number.

The artists reserve the right to verify the installations and the equipment and to communicate directly with rigger(s).
